Easter Egg Scavenger Hunt

Objectives Targeted: following directions with basic concepts; describing; articulation; turn-taking

Materials Needed: a set of 8-10 plastic colored eggs for each child (each child should have a different color); candy, objects, or pictures for inside the eggs

Directions:
1) Fill plastic eggs with various objects that they can describe after they collect their eggs (or fill them with candy or a picture with target sound).

2) Place eggs in basket and tell each child what color their eggs will be.

3) Each child will take turns following directions of where to ‘hide’ their peer’s eggs. (see examples of 1-2 step directions below)

4) After the children have hidden the eggs, give them baskets to go and collect their color eggs. Remind them that they cannot open the eggs until they are seated at the table with all of their eggs. They can help each other out by telling them where their eggs are using the basic concepts.

5) Bring unopened eggs to the table and open one at a time. Describe the object that is inside of the egg and get a jelly bean if they did a good job describing the object. (Or if working on articulation, put pictures from Boardmaker of target sound words in eggs and child must open one egg at a time to practice producing target words)
